

DESI PAK® BENTONITE CLAY DESICCANTS HUMITECTOR™ HUMIDITY INDICATORS

MOISTURE PROTECTION FOR STORED OR PARKED AIRCRAFT
AND AIRCRAFT ENGINE PRESERVATION

DESI PAK® BENTONITE CLAY DESICCANT BENEFITS:

- Desi Pak® bentonite clay, a natural, sustainable desiccant solution
- Even at full saturation, remain free-flowing, no leakage
- Production of bentonite desiccants have less impact on the environment: no harsh chemicals used in production, and the re-cultivation and re-naturalizing of mined sites
- Desi Pak® desiccant bags meet various global specifications: German DIN 55473 and TL 6850-0008, French specification AFNOR NF H 00321, and MIL-D-3464 (Mil-Spec)
- Established global & regional supply networks
- Desi Pak® desiccant bags effectively adsorb moisture to help combat its damaging effects, including corrosion, mold, and degradation
- Available in a variety of configurations

HUMITECTOR™ HUMIDITY INDICATOR BENEFITS:

- Originator of humidity indicator products, recognized as a world-wide leader
- Complete proof of dry pack integrity — color-changing spots record changes in relative humidity in a sealed area
- Strict color meter testing
- Automated optical inspections (AOI)
- Possible detection of damages by maximum humidity surpassed
- Meet standards set forth by military agencies such as Mil-Spec
- Desiccator plugs: check the humidity levels without exposing goods to external elements
- Available in a variety of configurations

DESI PAK® AND HUMITECTOR™ EXAMPLE OF APPLICATION POSSIBILITIES TO HELP PREVENT MOISTURE DAMAGE:

Example illustration, please check appropriate maintenance manuals for proper placement and dosage of desiccant and humidity indicators
